*LEED Intent:
to reuse building materials and products in order to reduce demand for virgin materials and to reduce waster, thereby reducing impacts associated with the extraction and processing of virgin resources.*

*LEED Intent:
to increase the demand for building products that incorporate recycled content materials therefore reducing impact resulting from extraction and processing of virgin resources.*

*LEED Intent:
to increase the demand for building products that are extracted and manufactured within the region thereby reducing the use of indigenous resources and reducing the environmental impacts resulting from transportation (800km or 500m from the project site).*

*LEED Intent:
to reduce the use and depletion of finite raw materials and long-cycle renewable materials by replacing them with rapidly renewable materials*

*LEED Intent:
to encourage environmentally responsible forest management (only Forest Stewardship Council or FSC is currently recognized).*

*LEED Intent:
to reduce the quantity of indoor air contaminants that are odours, potentially irritating and/or harmful to the comfort and well being of installers and occupants*
